

LIQUID TRACE

MICRONUTRIENT SUPPLEMENT

A complete source of secondary nutrients chelated with natural carbon sources.

GUARANTEED ANALYSIS

Magnesium (Mg)	0.50%
Sulfur (S)	3.00%
Boron (B)	0.02%
Iron (Fe)	1.75%
Manganese (Mn)	1.00%
Molybdenum (Mo)	0.0005%
Zinc (Zn)	2.00%

Derived from: Boric Acid, Citric Acid, Ferrous Sulfate, Magnesium Sulfate, Manganese Sulfate, Molybdenum, Zinc Sulfate

NON-PLANT FOOD INGREDIENTS

Sea Plant Extract 8%

Derived from: *Ascophyllum nodosum*

Weight per gallon: 9.6 lbs
pH: 2.5

Liquid Trace is intended as a supplement to a regular fertilization program and may not by itself provide all the nutrients normally required by plants

The information contained in this brochure is believed to be accurate and reliable. It is provided as a means of explaining the products for the benefit of the potential user. EnP Investments cannot be held responsible for any unintentional errors in description of usage due to errors or omissions. EnP Investments further warrants that the products represented in this brochure conforms to the chemical description and are reasonably fit for the purposes stated on the label when used in accordance with directions under normal conditions of use. EnP Investments shall not be responsible for incidental or consequential damages resulting from the use of any product contrary to label instructions or under abnormal conditions or conditions not reasonably foreseeable to EnP Investments.

LIQUID TRACE

- Liquid Trace can be effectively used to correct micronutrient deficiencies and is especially useful on turf grown in sand based soil mediums.
- Liquid Trace provides nutrients that promote better photosynthesis
- A generous dose of sea plant extract is included to enhance rooting, delay plant senescence, and to fortify the plant stress defense system.
- Complex sugars and organic acids promote effective uptake and utilization of nutrients.
- Liquid Trace provides nutrients which are vital for important metabolic processes necessary for healthy plant growth.

GENERAL USE GUIDE

Greens and Tees and Sports Turf	Apply 1.0 to 3.0 fl oz per 1,000 sq ft every 7 to 21 days.
Fairways and Lawns	Apply 2.0 to 5.0 fl oz per 1,000 sq ft every 3 to 4 weeks.
New Seeding and Overseeding	Apply 2.0 fl oz per 1,000 sq ft immediately after seeding.
Aeration of Greens and Tees	Apply 4.0 to 5.0 fl oz per 1,000 sq ft in combination with first fertilizer application following aeration.
Ornamentals	Foliar Spray: 24 to 36 oz per 100 gal Soil Drench: 2 to 3 oz per caliper inch
