Cleans up turbidity, enhances water clarity and aids in elimination of foul odors. Digests decomposing matter such as leaves, needles, grass clippings, bottom sludge and muck, surface scum, fat, grease, and fish and animal waste. Ingests carbon, phosphorous, potassium and nitrogen at accelerated rate, limiting the nutrients available for algae to consume. This control by competitive inhibition increases water clarity, reduces sludge and promotes improved survival and disease resistance for aquatic inhabitants.

Canals, Lakes and Ponds

Initial Application: Apply 2 gallons per acre foot of water. Apply using CLEAN hand sprayer. Walk edges of banks and spray towards center.

For larger ponds & lakes apply from boat starting in middle of lake spraying in large circles moving toward lake bank.

Maintain Monthly: Apply 1 gallon per acre foot of water.

Greens Surface

Apply 1 gal. per acre every 3 days for reduction and elimination of excess silt, slime, etc. on greens. Irrigate lightly after application.

Greens Profile

Apply 1 gal. per acre weekly for reduction of black layer, biomass build-up and thatch. **Note:** For treatment of significant build-up, apply twice weekly at 1 gal. per acre. Irrigate after each application to move product into soil profile.

Fairy Ring

At beginning signs apply 1 gal per acre twice weekly. Once visual signs fade, apply every 3 weeks. Irrigate after each application to move product into soil profile.

Problematic Fairy Ring

Open affected area via cup cutter. Mix 1 qt. in 5 gal. of water. Drench holes and replace plugs. Repeat weekly until desired results are achieved.

Equipment Wash Rack

Apply 1 gal. per week into drains or spray onto accumulated clippings. Will speed decomposition, reduce clogging and eliminate foul odors.

**Environmentally Safe. Will not harm animals or humans
and is completely safe for marine life.**

SHAKE WELL BEFORE USING

Do not mix with pesticides or other chemicals that may harm beneficial bacteria

2 Year Shelf Life - Store inside Chemical Facility

First Aid Measures: Skin contact, Wash off with plenty of water. Eye Contact, Wash immediately with copious quantity of water. Ingestion: Rinse mouth and throat and drink water to dilute. Excessive ingestion may cause nausea or diarrhea. Inhalation, Not applicable. If symptoms persist seek medical attention.
May be irritant to skin and eyes. **KEEP OUT OF REACH OF CHILDREN**
